

Air Oasis™

"Air Purifying Perfection Made Simple."

Air Oasis™ Air Purification Products

As a Board Certified Traditional Naturopath my passion has been to educate my clients on the Quantum Basics of Life: Breathe Clean Air, Drink Clean Water, and Consume Quality Nutrition. Clean air is a key component of wellness. The Air Oasis patent pending technology purifies your air creating a safe environment for your family and pets. The negative ions produced by the exclusive Air Oasis technology are also essential for reducing harmful mold, bacteria, viruses, VOCs and odors from your air.

The Air Oasis technology does not utilize potentially dangerous levels of ozone like many of our competitors. Instead, it converts ozone to safer and more effective ions via our patented nano-Nickel HCT™ catalyst.

"Air Purifying Perfection Made Simple."

AHPCO™ Cell Technology

AHPCO™ is an **Advanced Hydrated Photocatalytic Catalytic Oxidation** technology consisting of a broad spectrum high intensity UV light targeted on our nano-Nickel HCT™ catalyst in a low-level ozone and moist atmosphere. This converts harmful ozone into safe yet aggressive oxidizers that kill mold, bacteria, viruses and more. They also effectively neutralize odors, VOCs, and other contaminants. Once the oxidizers have done their job, they revert back to water and CO₂. By utilizing high quality American made UV lamps, the AHPCO Cell only needs to be replaced every three years compared to our competitors whose lamps need to be replaced once a year.

Nanotechnology has finally arrived in air purification! "...nanotechnology, ...and environmental science...the potential both for improving the quality and increasing the length of life has never been greater."

Malcolm Gillis
President
Rice University

Air Oasis has taken the AHPCO Cell technology to a new level with the introduction of the nano-Nickel HCT™ catalyst.

This patent-pending technology utilizes nano-sized metals to expand the surface area of the catalyst and increase the kinetic rate of reaction. This helps to further reduce ozone and create friendly oxidizers to eliminate contaminants.

Air Oasis™ User Testimonials

I had been suffering with allergy type symptoms when I would go to bed for almost a year. Throughout the year I researched the different units available and was not impressed. As fate would have it I stumbled across the Air Oasis 3000. Providing air test kits to validate your product is definitely "putting your money where your mouth is."

Thanks for the restful nights.

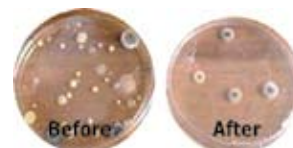

Mark B.

This picture is a great testimony to your product. I had no idea how bad my air was until I did the test. It's nice to know that I am breathing clean air now and feel much better knowing that my 3 kids are breathing good air as well. I just ordered the mini air oasis for my office.

Thank you for the great product - it really does work!

Bob D.

Air Oasis™ Xtreme Air Purifier

The Air Oasis 3000 Xtreme air purifier is recommended for areas up to 3000 square feet with higher contamination levels. Musty basements, nail salons, hair salons, and other high odor or high mold and bacteria areas are ideal for the 3000 Xtreme air purifier. It can be used in larger highly contaminated or light commercial applications. If you want durability then you'll love the artistic brushed aluminum housing.

Air Oasis™ Mini Air Purifier

The new Air Oasis Mini air purifier provides all the same great benefits as the 3000 and 1000 models, but in a much smaller package. This air purifier is ideal for areas up to 500 square feet such as a bedroom or office.

\$299.99 US

**Start breathing
clean air today!**

Air Oasis™ Commercial 5000

**Why not get
one today!**

\$749.99 US

The Air Oasis 5000 air purifier provides the same great benefits found in all the Air Oasis models, but is much more powerful for commercial applications. This air purifier is ideal for areas with very high odor and/or contaminant levels. It is to be used in unoccupied commercial applications. It is portable and has a convenient handle for transport.

Air Oasis™ Induct ACT™ 9

**A definite must
have!**

\$549.99 US

The Induct ACT provides the same great benefits as the 3000 model, but is designed to be placed in the duct work of your air conditioning system to provide whole house air purification. The Induct ACT is capable of covering between 1000 and 3000 square feet while being complete silent.

Air Oasis™ Induct ACT™ 14

\$699.99 US

The Air Oasis Induct 14" air purifier provides all the same great benefits as the Induct 9" model, but is much more powerful. This air purifier is ideal for areas with higher contaminant levels and is to be used in commercial applications.

Air Oasis™ Induct ACT™ Dual 14

\$1299.99 US

The Air Oasis Dual Induct 14" air purifier provides all the same great benefits as the Induct 14" model, but is much more powerful. This air purifier is ideal for areas with very high contaminant levels. It is to be used in commercial applications.

Each air purifier has a 30-day money back guarantee, comes with a three year warranty, requires no maintenance for 3 years, reduces mold, bacteria, viruses, odors and VOCs quickly, has a whisper quiet fan and operates on pennies.

****Air Oasis Xtreme and 5000 have louder and more powerful fans than the other units.****
